

Cindy and I will be meeting on February 6 to discuss next year's TSSP money allocations. We used that money this year to increase the number and hours of our interventionists. Please provide feedback about our interventionists. Are there any things you would like to see them change/add to their duties?

Only if they could do some work in math, as well. It would be great if we could get regular intervention with some of our low math students.

I think they are doing great!

I am not sure if this is where the money for Liana's extra hours came from but having her work more hours has been a life saver. I wouldn't be able to cover all the time needed by some of my students without her extra hours. As far as Cindy's interventionist, I hear the teachers saying good things. They are highly valued by the general education teachers.

I loved our interventionists! I say that it was money well spent! I hope that we can have them all again next year!

I think they're doing an amazing job, but I would also like to see them understand the 95% program, so they can read texts with our 95% students that help to apply and focus the skills.

I think that the interventionist are doing an amazing job. I love that they are able to meet with every student. This gives everyone a chance to read more often and practice their fluency skills. I also love that they are able to change out the baggy books for us everyday.

I love mine! Thank you!

I love having the interventionists at our school. My reading interventionist has made such a difference in my classroom and I love having Delyn come in every single day. The baggie books have been a wonderful program.

I have loved having an interventionist in my classroom during my entire small group reading time. I think that it has been very beneficial to have another adult reading with my students for the full hour. I can tell that she takes the time and care to plan lessons, and use materials that meet my students' needs. I believe it would be beneficial to continue to have these interventionists in our classrooms next year, as well.

No. They are doing a great job.

I have been really pleased with the reading interventionists that I have had. I have been lucky to have one for the full hour reading group block. I would like to have more support in math, specifically with word problems if that is in the budget.

I love our interventionists and our aids. They are all doing a great job.

My interventionist does a great job! She always makes sure to be prepared with level-appropriate materials.

I feel like they do a great job helping kindergarten! :)

I love the interventionists that I have had this year! They are doing awesome work with my students and have improved their comprehension and reading skills so much!
